Matías Nuccetelli
Frontend Engineer

About me

I'm a Software developer mostly focused in Frontend engineering, born and raised in Buenos Aires, Argentina. I love the web-world since I'm a child. At the age of 15 I started coding in HTML & CSS, and I was so very excited about these technologies, so at 17, I started programming in JavaScript and my mind started blowing. I always studied and learned on my own.
Date of birth: 03/28/2000
Education: Colegio Padre Castañeda (primary school and high school)

Knowledge

Frontend: HTML, CSS, JavaScript, Bootstrap, ReactJS, NextJS, Tailwind CSS, MaterialUI.

Backend: NodeJS, Express.

Extra: socket.io, Git, Figma, Supabase, Electron, Docker.

Experience

Datia | Sweden (Remote) (Nov 2020 - Now):
Datia helps you automate your sustainability workflows and manage the EU Taxonomy and Sustainable Finance Disclosure Regulation.
Role in the company: Software Engineer.
Stack: ReactJS, NextJS, MaterialUI, TailwindCSS, NodeJS, Express, PostgreSQL, Docker.

Rather Labs | Argentina (Remote) (Aug 2020 - Nov 2020):
We all like to give recommendations about certain aspects of our lives that we enjoy, that we value or use. And on those aspects that we remain in doubt, we like to consult people we know can give us valuable recommendations.
Role in the company: Front-end developer.
Stack: NextJS and a CSS framework named "RatherCSS" very similar to TailwindCSS built by me.

Projects

Storm (July 2021 - Now):
Storm is an open source torrent client available on macOS, Linux, and Windows. With a beautiful user interface, Storm tries to make it easy for users to download and share torrent files.
Stack: Electron JS, NodeJS, React.JS, socket.io.

NextTime (July 2020 - Now):
NextTime is an open source web application that allows you to know the time in any country in the world, either now or in the future.
Stack: VueJS, Bootstrap.

Bitflix (May 2020 - Now):
Bitflix is an open source web application that lets you to watch movies and TV Shows using torrents directly in your browser. App was totally developed and designed but me, but it is also connected to third party API's and projects.
Stack: Next JS, NodeJS, Express, TailwindCSS.

You can find more personal projects on my GitHub account.

Languages

Spanish (native) and english.
